

*208.040 **TRITURATOR** - MANUAL

MOULIN N°10

INSTRUCTIONS

DISMANTLING

Casing:

Press slightly on one of the two fastening lugs and release from side of hopper

Hopper and Cross-piece:

Press on the two holding springs, in order to have the clips drop down by themselves.

Shaft:

Pull it out by rotating it clockwise, in order to keep clear of the stopping blade.

Sieve:

Seize it in both hands by the outer side and unfasten anticlockwise with a dead blow.

NOTE

When the machine is new, the inside of the sieve is rough, in order to make the L.T. TRITURATOR effective.

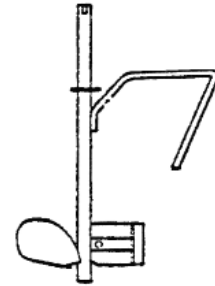

On the contrary, when the inside of the sieve is becoming smooth, it must be replaced.
